2. Subject of the Contract and Underlying Commodity

2.1. Power

2.1.1. Underlying

Delivery or acceptance of delivery of electricity with a constant output of 1 MW into the maximum-voltage level of the respective market area during the delivery time on every delivery day during the delivery period.

2.1.2. Market Areas

2.1.2.1. Physical Fulfilment

Futures with physical fulfilment within the respective control area can be traded for the following market areas:

- Belgium,
- France, and
- The Netherlands.

2.1.2.2. Financial Fulfilment

Futures with financial fulfilment can be traded for the following market areas:

- Germany/Austria,
- France, and
- Italy,
- Nordic*,
- Spain*, and
- Switzerland*.

* Expected as of February 2015

2.1.3. Delivery Time

Delivery time is the days and their hours that are comprised by the respective delivery period according to the contract concerned:

2.1.3.1. Base

00:00 until 24:00 for all days of the week (Base)

2.1.3.2. Peak

08:00 until 20:00 for all days Monday through Friday (Peak) and 08:00 until 20:00 for the days Saturday and Sunday (Peak Weekend) respectively

2.1.3.3. Off-Peak

00:00 until 08:00 and 20:00 until 24:00 Uhr for all days Monday through Friday as well as the hours between 00:00 and 24:00 at weekends (Off-Peak)

2.1.4. Delivery Period

The Delivery periods for the respective market area may be: Day, Weekend, Week, Month, Quarter and Year.

2.1.5. Tradable Delivery Periods

2.1.5.1. Physical Futures

- Belgian Power Baseload Month/Quarter/Year Futures
- Dutch Power Baseload Month/Quarter/Year Futures
- Dutch Power Peakload Month/Quarter/Year Futures
- French Power Baseload Week/Month/Quarter/Year Futures
- French Power Peakload Week/Month/Quarter/Year Futures

2.1.5.2. Financial Futures

- Phelix Base Day/Weekend/Week/Month/Quarter/Year Futures
- Phelix Peak Day/Weekend/Week/Month/Quarter/Year Futures
- Phelix Off-Peak Month/Quarter/Year Futures
- French Base Day*/Weekend*/Week/Month/Quarter/Year Futures
- French Peak Week/Month/Quarter/Year Futures
- Italian Base Day*/Weekend*/Week/Month/Quarter/Year Futures
- Italian Peak Week/Month/Quarter/Year Futures
- Nordic Base Month/Quarter/Year Futures*
- Spanish-Base-Day/Weekend/Week/Month/Quarter/Year-Futures*
- Swiss-Base-Month/Quarter/Year-Futures*

* Expected as of February 2015.

2.1.6. Contract Volume and Minimum Lot Size

- Contract Volume:

The contract volume is calculated by multiplying the number of delivery days in the delivery period with the quantity to be delivered daily. This quantity usually amounts to 24 MWh, on the day of the switch from winter time to summer time it amounts to 23 MWh, whereas on the day of the switch from summer time to winter time it amounts to 25 MWh.

The contract volume of physically fulfilled Futures:

As of the second exchange day before the beginning of the delivery period the contract volume is reduced at the end of trading by the quantity of electricity which is to be delivered.

The quantity to be delivered is the quantity for the delivery day which follows the next exchange day (t+2) in each case. In case this delivery day is not an exchange day, the quanti-

ties for all delivery days following that delivery day up until and including the next exchange day are to be delivered additionally.

- Minimum lot size: 1 contract or a multiple thereof

2.1.7. Tradable Maturities

At maximum the following maturities can be traded at EEX:

2.1.7.1. Day Futures

- The respective next 34 days (Day Future),

2.1.7.2. Weekend Futures

- The respective next 5 weekends (Weekend Future),

2.1.7.3. Week Futures

- The current and the next 4 weeks (Week Future),
- The next 5 weeks (physical French Week Future),

2.1.7.4. Month Futures

- The current and the next 6 months (Belgian/Dutch/Italian/Nordic Month Future),
- The current and the next 9 months (Phelix/French Month Future),

2.1.7.5. Quarter Futures

- The respective next 7 full quarters (Belgian/Dutch/Italian/Nordic Quarter Future)
- The respective next 11 full quarters (Phelix/French Quarter Future),

2.1.7.6. Year Futures

- The respective next 6 full years (Year Future)

The exact number of tradable maturities is determined by the Management Board of the Exchange and announced before implementation.

2.2. Coal

2.2.1. Underlying

Delivery or acceptance of delivery of steam coal having a calorific value of 6000 kcal/kg net as received (NAR) and 1% Sulphur at maximum within 90 days at the delivery point:

- cif Amsterdam–Rotterdam–Antwerp (cif ARA)
- fob Richards Bay, South Africa (fob Richards Bay).

The Futures are settled financially against the monthly coal price indices API 2* (cif ARA) and API 4* (fob Richards Bay), respectively, during the respective delivery period as published in Argus McCloskey's Coal Price Index Report on the last Friday of each month (monthly index). Each monthly index is the mean average of all the weekly indices of the respective delivery point published in the relevant month.

*

API 2 and API 4 are trademarks of and used under licence from Argus Media Limited and IHS Global Limited. All copyrights and database rights in the API 2 and API 4 Indices belong exclusively to Argus Media Limited/IHS Global Limited. All rights reserved. Argus and IHS take no position on the purchase or sale of EEX's financially settled listings.

2.2.2. Contract Volume and Minimum Lot Size

- Contract volume: 1,000 metric tons;
- Minimum Lot Size: 1 contract or a multiple thereof

2.2.3. Tradable Contracts

API-2-CIF-ARA-(Argus-IHS McCloskey)-Coal-Month/Quarter/Year-Futures

API-4-FOB-Richards-Bay-(Argus-IHS McCloskey)-Coal-Month/Quarter/Year-Futures

2.2.4. Tradable Maturities

At maximum the following maturities can be traded at EEX:

2.2.4.1. Month Futures

- The current and the next 6 months

2.2.4.2. Quarter Futures

- The respective next 7 full quarters

2.2.4.3. Year Futures

- The respective next 6 full years

The exact number of the tradable maturities is determined by the Management Board of the Exchange and announced before implementation.

2.3. Emission Allowances

2.3.1. Underlying

Delivery or acceptance of delivery of EU Emission Allowances, EU Aviation Allowances, and Green Certified Emission Reductions, respectively.

2.3.1.1. EU Emission Allowance and EU Aviation Allowance

EU Emission Allowance (EUA) and EU Aviation Allowance (EUAA), respectively, permit to emit one ton of carbon dioxide or one ton of a carbon dioxide equivalent within the meaning of the directive 2003/87/EC of 13 Oct. 2003 last amended by directive 2009/29/EG of 23 April 2009 in its valid version at the time of concluding a contract, which are kept by a register within the meaning of art. 19 of this directive and which can be transferred at the respective delivery day within the scope of said directive or any respective succeeding rule.

2.3.1.2. Green Certified Emission Reductions

Green Certified Emission Reductions (CER)* are certified emission reductions from Bilateral Projects** according to article 12 of the Kyoto Protocol and the Kyoto Protocol decisions of the United Nations Framework Convention on Climate Change (UNFCCC) in their respective valid version at the time of delivery, corresponding to one tonne of carbon dioxide or equivalent which can be used at the respective delivery day for means of compliance according to the valid rules EU ETS and which are freely transferred, including all projects except those involving the destruction of trifluoromethane (HFC-23) and nitrous oxide (N₂O) from adipic acid production as well as large hydro projects exceeding 20MW.

* CERs generated from projects in countries listed by OFAC (www.treasury.gov), are excluded.

** Bilateral Projects: Projects which hold a letter of approval (LoA) from the project host country as well as a LoA from a designated national authority (DNA) of a contractual state according to Annex I of the Kyoto Protocol as part of the project documentation submitted and published by the UN.

2.3.2. Contract Volume and Minimum Lot Size

2.3.2.1. Spot Market

- EU Allowances / EU Aviation Allowances – Primary Auction
 - Contract volume: 1 EUA and EUAA, respectively,
 - Minimum lot size: 500 contracts or a multiple thereof
- EU Allowances / EU Aviation Allowances / CER Contracts – Secondary Trading:
 - Contract volume: 1,000 EUA, EUAA, and CER, respectively,
 - Minimum lot size: 1 contract or a multiple thereof

2.3.2.2. Derivatives Market

- European Carbon Futures/EU Aviation Allowances Future/CER Futures
 - Contract volume: 1,000 EUA, EUAA, and CER, respectively,
 - Minimum lot size: 1 contract or a multiple thereof

2.3.3. Time of Fulfilment and Delivery Day

The time of fulfilment and the delivery day, respectively, is for spot market contracts on the first ECC Business Day after the conclusion of the contract and for derivatives contracts on the second ECC Business Day after the last trading day.

2.3.4. Maturities of Derivatives Contracts

Maturities can be: Month, Quarter, December

2.3.5. Tradable Contracts

2.3.5.1. Spot Market

- EU Allowances – Primary auction
- EU Allowances – Secondary trading
- EU Aviation Allowances – Primary auction
- EU Aviation Allowances – Secondary trading
- CER Contracts

2.3.5.2. Derivatives Market

- European Carbon Month*/Quarter*/Dec Futures – Secondary trading
- EU Aviation Allowances Dec Futures
- CER Dec Futures

* Expected as of February 2015.

2.3.6. Tradable Maturities for Derivatives Contracts

At maximum the following maturities can be traded at EEX:

2.3.6.1. Month Futures

- The current and the next 2 months, if no EUA DEC Future or EUA Quarter Future expires at the respective maturity date (EUA Month Future)*.

2.3.6.2. Quarter Futures

- The current and the next 11 quarters, if no EUA DEC Future expires at the respective maturity date (EUA Quarter Future)*

2.3.6.3. December Futures

- all December maturities up to and including Dezember 2020 (European Carbon Future – Primary auction);
- all December maturities up to and including Dezember 2020 (EUA DEC Future, EU Aviation Allowance Future, CER Future)

The exact number of the tradable maturities is determined by the Management Board of the Exchange and announced before implementation.

* Expected as of February 2015.

2.4. Guarantees of Origin

2.4.1. Underlying

Delivery or acceptance of delivery of Guarantees of Origin (GoO).

Valid Guarantee of Origin in the meaning of Article 2 (j) of Directive 2009/28/EC of electricity produced from renewable energy sources in accordance with Article 15 of Directive 2009/28/EC issued by the competent member state or designated competent body and certifying 1 MWh production of a Hydro-electric head installation located

- in Denmark, Finland, Norway, or Sweden (Nordic Hydro Power)
- in Germany, Austria or Switzerland (Alpine Hydro Power)

that has not benefited from a national support scheme, thus being consistent with Code 0 of EECS Rules Fact Sheet 3 - TYPES OF PUBLIC SUPPORT;

- Belgium, Denmark, Germany or the Netherlands

that might have benefited from a national support scheme, thus being consistent with Code 0, 1, 2, 3 or 4 of EECS Rules Fact Sheet 3 - TYPES OF PUBLIC SUPPORT.

The production of electricity certified by the GoO must have occurred in the months preceding the maturity of the futures contract according to the following scheme:

Maturity	Valid period of certified production
March	April – December of the previous calendar year
December	January – December of the on-going calendar year

2.4.2. Contract Volume and Minimum Lot Size

- Contract Volume: 1,000 GoO
- Minimum lot size: 1 contract or a multiple thereof

2.4.3. Maturities

Maturities are: March and December

2.4.4. Tradable Contracts

- Futures on Guarantees of Origin on Nordic Hydro Power
- Futures on Guarantees of Origin on Alpine Hydro Power
- Futures on Guarantees of Origin on Northern Continental Europe Wind Power

2.4.5. Tradable Maturities

At maximum the following maturities can be traded at EEX:

- Maturities in December and March are tradable within the three years before maturity at the exchange

The exact number of the tradable maturities is determined by the Management Board of the Exchange and announced before implementation.

2.5. Options

2.5.1. Underlying

The buyer of a call option (call) is entitled to receive a long position in the corresponding future at the exercise price of the option on the last trading day.

The seller of the call option (call) receives a short position in the corresponding future after the call option is exercised and assigned at the exercise price on the last trading day.

The buyer of a put option (put) is entitled to receive a short position in the corresponding future at the exercise price of the option on the last trading day.

The seller of the put option (put) receives a long position in the corresponding future at the exercise price after the put option is exercised and assigned on the last trading day.

2.5.1.1. Power

Phelix Base Month Future and Phelix Base Quarter Future, respectively, with the same maturity, whereas the maturity corresponds to the delivery period of the future; and the Phelix Base Year Future of the year that follows the respective expiry date of the option, respectively.

2.5.2. Option Premium

The buyer of an option contract is obliged to pay the price for the purchase of the right of option (option premium) on the ECC Business Day after the purchase. The premium is credited to the seller of the option on the same day.

2.5.3. Type of Option

European type, i.e. the option can only be exercised on the last trading day.

2.5.4. Maturities

Maturities can be: Month, Quarter, Year

2.5.5. Tradable Contracts

- Phelix Base Month/Quarter/Year Options

2.5.6. Tradable Option Series

An option series is the total number of call and put options (call and put) with the same Underlying, the same exercise price and the same maturity which can be traded in the system.

At least three series with different exercise prices can be traded for each maturity; in this context one exercise price is in the money, one exercise price is at the money and one exercise price is out of the money upon their introduction into trading.

The management board of the exchange is entitled to change the number of tradable option series at any given time.

2.5.7. Tradable Maturities

At maximum the following maturities can be traded at EEX:

- The respective next 5 delivery months (Phelix Month Option),
- The respective next 6 delivery quarters (Phelix Quarter Option),
- The respective next 3 or 4 delivery years* of the underlying (Phelix Year Option)

* For each delivery year of the underlying up to 4 contracts with different expiry dates at the end of each quarter of the preceding year are available. For each underlying are available:

Expiry end of March:	Phelix Base Year Apr Option
Expiry end of June:	Phelix Base Year Jul Option
Expiry end of September:	Phelix Base Year Oct Option
Expiry end of December	Phelix Base Year Jan Option

New maturities will be introduced for trading to such an extent that always 12 maturities referring to the next 3 or 4 delivery years of the underlying are tradable.

The exact number of the tradable maturities is determined by the Management Board of the Exchange and announced before implementation.

2.5.8. Exercise

The option can only be exercised on the last trading day. Said exercise is carried out by means of an entry into the EEX system between 08:00 a.m. and 03:00 p.m. (Exercise Period) on the last trading day.

On the last trading day starting at 2 p.m. the exchange determines the intraday market value of the underlying (Intraday Fixing Price) and publishes it in due time before the end of the Exercise Period.

In deviation to sentence 1, options which are in the money in relation to the Intraday Fixing Price are exercised automatically at the end of the exercise period unless the trading participant has made a deviating entry into the system by that time.

Exercises only become effective at 03:00 p.m., until that time they can be changed or deleted at any time.

3. Pricing and Minimum Price Fluctuation

3.1. Euro Denominated Products

Pricing in EUR per

- EUA, EUAA, CER, and MWh to the second decimal place
- GoO to the third decimal place

Minimum price fluctuation:

- EUR 0.01 per EUA, EUAA, CER, and MWh
- EUR 1.00 per GoO

Minimum price fluctuation per contract is determined by multiplying the minimal price fluctuation per unit with the contract volume and the amount of delivery hours, respectively.

3.2. USD Denominated Products

Pricing in USD per

- Tonne (coal) to the second decimal place

Minimum price fluctuation:

- USD 0.01 per tonne

Minimum price fluctuation per contract is determined by multiplying the minimal price fluctuation per unit with the contract volume and the amount of delivery hours, respectively.

3.3. Pricing for the Option Premium

Pricing in EUR per

- MWh to the third decimal place

Minimum price fluctuation:

- EUR 0.001 per MWh

4. Last Trading Day for Derivatives Market Contracts

4.1. Power

4.1.1. Physical Settled Futures

The Last Trading Day:

- of the Month Future
is two exchange trading days before the last delivery day of the delivery month
- of the French Power Week Future
is the penultimate exchange trading day before the first delivery day of the delivery period.
Thus, this day usually is a Thursday. If the Thursday and/or the Friday are not exchange trading days:
Wednesday, if either Thursday or Friday are no exchange trading days
Tuesday, if neither Thursday nor Friday are exchange trading days
- of the Quarter/Year Future
is the third exchange trading day before the beginning of the delivery period.

4.1.2. Financially Settled Futures

The Last Trading Day:

- of the Day Future
is the day at which the hourly auction for the respective delivery day on the EPEX SPOT Market is conducted
- of the Weekend Future
is the Friday before the beginning of the delivery period,
- of the Base Week Future
is the Friday of the current delivery period,
- of the Peak Week Future
is the Thursday of the current delivery week,
- of the Month Future
is the day the hourly auction for the last delivery day of the delivery month on the EPEX Spot Spot Market is conducted. Trading ends at the time of the end of the submission of bids for the hourly auction on the EPEX Spot Spot Market (usually at 12:00) on that day.

If this day is not an exchange trading day, the Last Trading Day is the previous exchange trading day.

- Of the Quarter/Year Future
is the third exchange trading day before the beginning of the delivery period

4.2. Coal

The Last Trading Day:

- of the Month Future
is the last Friday of the delivery month

If this day is not an exchange trading day or if it is a public holiday in Great Britain, the Last Trading Day is the previous exchange trading day.

- of the Quarter/Year Future
is the third exchange trading day before the beginning of the delivery period

4.3. Emission Allowances

The Last Trading Day:

- is mid of the respective maturity month, on which due to market praxis futures on EUA, EUAA, and CER, respectively, usually expire.

The last trading day for each contract will be published by the Management Board of the Exchange prior to introduction of a maturity to trading at the latest.

4.4. Guarantees of Origin

The Last Trading Day is an exchange trading day within the calendar month of the respective maturity of the contract. It will be determined by the Management Board of the Exchange prior to the introduction of a maturity to trading at the latest. The Last Trading Day will normally be at least two weeks before the last calendar day of that specific month.

4.5. Options

4.5.1. Last Trading Day

The Last Trading Day:

- Month Option
 - Delivery month of January: the third Thursday of the preceding December
 - All other delivery months*: four exchange trading days prior to the beginning of the delivery month
- * The Last Trading Day of the 2014-06-Contract (O1BM Jun14) is five exchange trading days prior to the beginning of the delivery month.
- Quarter Option
 - First quarter of a given year: the third Thursday of the preceding December
 - All other quarters: four exchange trading days prior the beginning of the delivery quarter
- Year Option
 - Phelix Base Year Jan Option: The second Thursday in December
 - All other maturities: four exchange days before the end of the quarter

4.5.2. Expiry Day

Options which have not been exercised expire at 03:00 p.m. on the Last Trading Day.

5. Fulfilment

5.1. Cascading

For the following Future contracts longer maturities cascade into corresponding shorter maturities:

- Power Futures
- Coal Futures

5.1.1. Year/Quarter Contracts

On the third ECC Business Day before the beginning of the delivery period, each open position in a Year Future is replaced by equivalent positions in the three Month Futures for the delivery months from January through to March and the three Quarter Futures for the second through to the fourth delivery quarter whose delivery periods together correspond to the delivery year.

On the third ECC Business Day before the beginning of the delivery period, each open position in a Quarter Future is replaced by equivalent positions in the three Month Futures whose delivery months together correspond to the delivery quarter.

5.2. Power

5.2.1. Final Settlement Price

5.2.1.1. Financial Futures

The determination of the respective final settlement price is based on an Index which is the mean value of all auction prices of the hourly contracts traded for the respective market area and delivery period (Base/Peak/Off-Peak) for all days of the respective delivery period.

EEX determines the Index on each exchange trading day by using the most valuable sources for the respective market area. As a rule the auction prices of the hourly contracts traded at the most liquid power spot exchange are used.

Currently, the reference price for the market area:

- Germany/Austria: is based on the hourly prices determined at the spot market of EPEX SPOT for this market area;
- France: is based on the hourly prices determined at the spot market of EPEX SPOT for this market area;
- Italy: is based on the “PUN Index GME” as determined by Gestore dei Mercati Energetici (GME);
- Nordic: is based on the Nordic Elspot System Price as determined by Nord Pool Spot;
- Switzerland: is based on the hourly prices determined at the spot market of EPEX SPOT for this market area;
- Spanien: is based on the “SPEL Base” Index as determined by OMIP.

The Management Board of the Exchange may use indexes of information service providers or any other appropriate sources in case exchange data are not available for EEX. EEX will publish in those cases the source that is used for calculation of the index

5.2.1.2. Physical Futures

The respective final settlement price is determined on the Last Trading Day (Week Futures) and two exchange trading days prior to the beginning of the delivery period (Month Futures), respectively. Thus, this is the settlement price that the entire contract volume of the respective contract is last traded for.

5.2.2. Physical Futures

The buyer is obliged to purchase the quantity of electricity agreed on every delivery day of the delivery period and to pay the purchase price plus the taxes payable on said amount.

The seller is obliged to deliver the quantity of electricity agreed on with constant power and duration on every delivery day.

5.2.2.1. Delivery and Acceptance of Delivery

Delivery and acceptance of delivery of power is effected, subject to the provisions specified in the Clearing Conditions, by submitting a nomination or schedule in accordance with the requirements of the respective Balancing Agreement, which comprises the underlying delivery transaction as well as the binding confirmation of the nomination or schedule by the respective transmission system operator.

On every delivery day only that the part of the contract shall be delivered which has been defined for delivery according to the respective contract specifications for delivery on every day of the delivery period.

5.2.2.2. Purchase Price

The purchase price for all delivery days in the entire delivery period is the final settlement price.

5.2.3. Financial Futures

The seller (buyer) is obliged to settle the difference between the price agreed on and the higher (lower) final settlement price in cash on the day of execution. The final settlement price may be negative.

Fulfilment is carried out between the clearing members and ECC AG. Cash settlement between non-clearing members and their own clients is the task of the clearing member in charge; the cash settlement between non-clearing members and their clients is the task of the non-clearing members concerned.

5.2.3.1. Month Futures

Fulfilment by means of cash settlement based on the final settlement price on the ECC Business Day following the Last Trading Day. If the final settlement price is determined on a Saturday Sunday or a public holiday following a Sunday, the cash settlement takes place on the second ECC Business Day after the Last Trading Day.

5.2.3.2. Week Futures

Fulfilment by means of cash settlement based on the final settlement price on the ECC Business Day following the day of determination of the final settlement price (as a rule Tuesdays).

5.2.3.3. Weekend Futures

Fulfilment by means of cash settlement on the second ECC Business Day following the Last Trading Day.

5.2.3.4. Day Futures

Fulfilment by means of cash settlement based on the final settlement price determined on the ECC business day following the day the settlement price is determined. If the final settlement price is determined on a Saturday, Sunday or a public holiday, the cash settlement takes place on the second next ECC Business Day after the Last Trading Day.

5.3. Coal

Fulfilment by means of cash settlement on the ECC Business Day following the Last Trading Day based on the difference between the settlement price of the exchange day before the Last Trading Day and the API 2* Month Index and API 4* Month Index, respectively.

The seller (buyer) is obliged to settle the difference between the settlement price of the previous ECC Business Day and the higher (lower) API 2* Month Index and API 4* Month Index, respectively, in cash.

Fulfilment is carried out between the clearing members and ECC AG. Cash settlement with non-clearing members and their own clients is the responsibility of the clearing member in charge; the cash settlement between non-clearing members and their clients is the responsibility of the non-clearing members concerned.

* API 2 and API 4 are trademarks and are used under licence from Argus Media Limited and IHS Global Limited. All copyrights and database rights in the API 2 and API 4 index belong exclusively to Argus Media Limited and IHS Global Limited and are used herein under licence. EEX is solely responsible for the operation of markets in API-2-CIF-ARA-(Argus-IHS McCloskey)-Coal- and API-4-FOB-Richards-Bay-(Argus-IHS McCloskey)-Coal-Futures. Argus and IHS take no position on the purchase or sale of such Products and exclude all liability in relation thereto.

5.4. Emission Allowances

5.4.1. Primary Auctions

5.4.1.1. Escrow Accounts

EU Allowances and EU Aviation Allowances, respectively, are held in escrow by ECC Lux in accounts as collateral security within the meaning of Article 2(m) of the Settlement Finality Directive as implemented in section 166 (3) 1 of the German Insolvency Statute.

5.4.1.2. Fulfilment

Fulfilment is carried out by delivering the purchased EU Emission Allowances or the purchased EU Aviation Allowances after payment: upon receipt of the payment by the auctioneer(s), ECC Lux transfers the purchased EU Emission Allowances and the purchased EU Aviation Allowances, respectively, into the internal account of the successful bidders in the ECC internal account system and subsequently makes the corresponding changes in the ECC Lux escrow accounts held at the registry.

5.4.1.3. Transfer of Allowances

Following fulfilment of the contract, successful bidders are entitled to demand the transfer of EU Allowances and EU Aviation Allowances, respectively, held in escrow for them, in the ECC Lux escrow accounts at the registry, to a registry account specified by them. The demand is executed at the latest on the first ECC Business Day after it is made.

5.4.2. Secondary Trading

5.4.2.1. Escrow Accounts

Emission Allowances (EUA, EUAA, or CER) are held in escrow by ECC Lux in accounts as collateral security within the meaning of Article 2(m) of the Settlement Finality Directive as implemented in section 166 (3) 1 of the German Insolvency Statute.

5.4.2.2. Fulfilment

ECC Lux transfers the purchased Emission Allowances into the internal account of the purchaser in the ECC internal account system and subsequently makes the corresponding changes in the ECC Lux escrow accounts held at the registry.

5.4.2.3. Transfer of Allowances

Each exchange Participant is entitled to demand the transfer of EUAs, held in escrow for them, in the ECC Lux escrow accounts at the registry, to a registry account specified by them. The demand is executed at the latest on the first ECC Business Day after it is made.

5.5. Guarantees of Origin

5.5.1.1. Escrow Accounts

Guarantees of Origin are held in escrow by ECC Lux in accounts as collateral security within the meaning of Article 2(m) of the Settlement Finality Directive as implemented in section 166 (3) 1 of the German Insolvency Statute.

5.5.1.2. Fulfilment

ECC Lux transfers the purchased Guarantees of Origin into the internal account of the purchaser in the ECC internal account system and subsequently makes the corresponding changes in the ECC Lux escrow accounts held at the registry.

5.5.1.3. Transfer of Guarantees of Origin

Each exchange participant is entitled to demand the transfer of Guarantees of Origin, held in escrow for them, in the ECC Lux escrow accounts at the registry, to a registry account specified by them. The demand is executed at the latest on the first ECC Business Day after it is made.

5.6. Options

5.6.1. Fulfilment

Options are fulfilled by booking in of the corresponding futures position at the respective exercise price after the option is exercised.

5.6.2. Assignment

If a buyer exercises his right of option, ECC AG assigns a seller of the same option series and of the same type of option (call or put) to the buyer with the help of a procedure maintaining the neutrality of the assignment process at the end of the post-trading phase on the exercise day. Partial assignments are permissible.

All assignments which have been executed for the agent position account of a trading participant have to be assigned by said trading participant for the positions of his customers; this has to be done with the help of a procedure which ensures the neutrality of the assignment process.

ECC AG informs all the parties involved as well as the clearing members supporting the parties involved about the assignment on the exercise day.
