Why participate in Emissions Auctions?

- Auctioning is the default method of allocating allowances within the EU Emissions Trading System (EU ETS) → this means that companies liable under the EU ETS have to buy a proportion of allowances (European Union Allowances (EUAs) and EU Aviation Allowances (EUAAAs)) through auctions
- Auctioning is an open, transparent, harmonised and non-discriminatory process (see [Auctioning Regulation](#))
- Advantages to participate in EUA/ EUAA Auctions at EEX:
 - ✓ Unique access to emissions auctions on 4-5 days/week, covering ~90% of European auction volume plus continuous trading on one single exchange
 - ✓ Variety of direct and indirect access options offered
 - ✓ Strong customers focus and personal assistance through our single admission team and offices in Leipzig, London, Madrid, Milan, Oslo and Paris
 - ✓ Fair and transparent price formation
 - ✓ Opportunity to hedge EU ETS business exposure

Who is eligible to bid in Emissions Auctions?

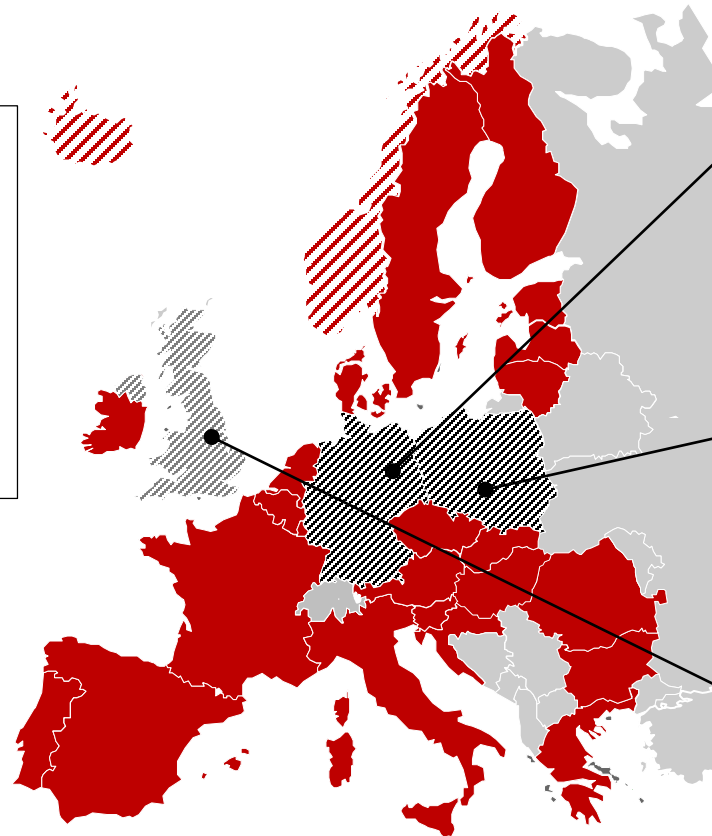

- Eligible participants according the EU Auctioning Regulation are:
 - ✓ Compliance buyers (operators of stationary installations, aircraft operators)
 - ✓ Investment firms and credit institutions
 - ✓ Business groupings of compliance buyers
 - ✓ Other intermediaries specifically authorised by the home Member State

- These participants have to fulfil admission requirements according to EU and EEX rules (see slide 5 for assistance in the admission process), i.a.:
 - ✓ Establishment in the EU (except for compliance buyers)
 - ✓ Hold a nominated holding account in the Union registry (see [details](#))
 - ✓ Hold a nominated bank account

When are Emissions Auctions? And what volumes are auctioned?

To be auctioned in 2018: approx. 938 million EUA and 5 million EUAA

EU ETS States are the sellers of the allowances. They appoint an auctioneer to sell on their behalf and appoint an auction platform which is responsible for conducting the auctions.
