Preliminary remark

This form constitutes the basic requirement for registration at ECC and serves the purpose of an appropriate Value Added Tax (VAT) classification of the trading participants in order to ensure adequate invoicing, thus avoiding VAT risks.

The VAT treatment of energy trades depends on the residency of the service recipient and service provider and on the inclusion of additional branch offices. Therefore all trading participants are required to fill in section 1 of the form, which contains general questions regarding the registered office and the potential inclusion of additional branch offices into the trading process as well as questions regarding the mandatory use of a Value Added Tax - Identification Number (VAT ID No.) as stipulated by Tax Authorities.

From a tax point of view, the consent in section 2 is a prerequisite for the recognition of any invoicing for physical delivery of commodities and other supplies to ECC in the form of credit notes. **Thus, the completion of this section is mandatory for all trading participants.**
