Delivery of natural gas upon expiry of futures is 0.002 € per MWh for TTF, GBp 0.0002 per Therm for NBP and ZEE and 0.01€ per MWh for all other markets. When determining the respective delivery fee of a trading participant, its opposite positions (long/short) in the regulated market and Non-MTF products for the same market area and maturity will be netted.

In case of a Transaction on a Spread between Contracts, only the trading fee on the first underlying Contract is applicable. In case of a Transaction on an Implied Order, only the Trading fee of the underlying Contract of the Implied Order executed on screen is applicable.
